Oguzhan Durace

AI Implementation & Business Systems

Workflow automation | Systems integration | Adoption

Berlin, Germany | durace.o@gmail.com | +49 176 8009 3317
linkedin.com/in/oguzhandurace | dureys.github.io/systems

AI systems builder combining business process ownership with practical AI implementation. Delivered 40% higher lead conversion and 60% less support triage time at Andercore. Brings seven years across enterprise platforms, stakeholder delivery and adoption; now building independent AI products while supporting a family textile business.

40% higher lead conversion | 60% less support triage time

AI workflow results at Andercore

PROFESSIONAL EXPERIENCE

Independent AI Systems Builder & Integrator

Independent projects | Dec 2025 to Present

Builds AI products and connected workflows, owning requirements, tool selection, integration logic and acceptance. Directs Claude and Codex for implementation and reviews behaviour against business rules.

- **Operational AI systems.** Deployed a Telegram to task and calendar service with validated actions, recovery and backups. Built MCP tools for a knowledge environment used in ongoing research and project delivery.
- **Product development.** Building a fantasy football publishing product from official league data to a designed magazine. Prototype in testing; owns data validation, editorial controls and preparation for reader launch.

Dodanlı / Prizma Tekstil

AI & Business Systems | Family Business Support | Dec 2025 to Present

Supports a small family business operation in textiles and carpets, alongside independent product building.

- **Export prospecting.** Completed AI assisted EU prospect research in approximately 30 minutes, compared with days of manual research.
- **Next implementation priorities:** Sales inquiry intake, quotation preparation and customer replies, supported by product information, website inquiry forms and shared follow up tracking.

Andercore GmbH

AI Automation Architect / Salesforce Product Owner | Aug 2024 to Aug 2025

Sole internal Salesforce owner across five markets, aligning sales, customer service, supply, logistics and finance.

- **40% higher lead conversion.** Connected LLM account enrichment with Make and Salesforce after shadowing sales users. Localised the workflow and added a feedback widget to refine adoption.
- **60% less support triage time.** Connected email, Make and OpenAI to classify category and subcategory and route requests to the responsible department. Expanded from selected pilot categories.
- **Commercial decisions and delivery.** Built a customer wallet using purchase history and potential versus realised value, plus pricing support from inventory, logistics and margin inputs. Automated lead assignment and reminders; owned UAT, documentation and training.

ubitricity GmbH | Shell subsidiary

Salesforce Product Manager | Apr 2023 to Aug 2024

Owned the roadmap and requirements for a five department Salesforce rebuild. Delivered Sales Cloud, Service Cloud and Sitetracker on time and within budget, coordinating migration and a phased rollout.

Built Salesforce Flow approvals, lead routing and onboarding. Aligned engineering, operations and commercial teams; trained field and office users.

Applied AI & Enterprise Delivery

Oguzhan Durace | System decisions, operating controls and earlier experience

SELECTED AI PRODUCTS AND IMPLEMENTATIONS

AI publishing product | Fantasy football magazine

Prototype in testing | Python, REST APIs, SQLite, HTML and PDF

Product: A recurring publication that turns league data into analysis and stories for fantasy football participants. **Flow:** Official results and player data → validated scores → forecast comparison → AI assisted editorial → designed magazine. **Delivery:** Reconciled 60 historical scores and passed 19 pipeline regression tests. Forecasts are frozen before matches and assessed against outcomes; numerical checks precede editorial generation. Owns product scope, data quality and editorial review, with the prototype in testing before reader launch.

AI task intake and tool integration

Deployed independent service | OpenAI, Python, PostgreSQL, Docker, Hetzner

Flow: Telegram → structured AI plan → Pydantic validation → Trello and Google Calendar, with operations saved in PostgreSQL. **Decisions:** Unclear dates trigger clarification; queries cannot modify tasks; retries reconcile earlier writes. Calendar mirroring and date sorting use deterministic rules. **Operating controls:** Authenticated intake, health checks, scheduled backups and a verified database restore. Owns workflow rules, integration behaviour and acceptance, directing AI coding agents for implementation.

Account research to reviewable sales actions

Working CRM prototype | OpenAI, Ollama, pandas, Streamlit

Problem: Repetitive account research and disconnected sales preparation. **Flow:** Account → external API enrichment → segmentation using deal history and engagement → outreach draft → human review. Three agents exchange structured outputs, with stage results and anomaly flags available for inspection. **Decision:** Separate stages so an error can be investigated without rerunning the entire workflow. Owns business rules, integration choices and acceptance; outreach approval stays with the user.

EARLIER ENTERPRISE AND PRODUCT EXPERIENCE

Accenture GmbH

Digital Business Integration Analyst | Jul 2021 to Apr 2023

Delivered 20+ Adobe Experience Manager forms across 10+ markets, coordinating requirements, localisation, go live and hypercare. Defined configuration management and application requirements for a global consumer goods client.

Lemon One GmbH

Process Manager and Salesforce Product Manager | Jul 2019 to Jun 2021

Owned the Salesforce backlog and operational workflows. Implemented validation rules and approvals supporting sales policy and data integrity.

SKILLS AND IMPLEMENTATION STACK

AI and integration: Claude, Codex, OpenAI API, Ollama, MCP, retrieval, evaluation, n8n, Make, Zapier, REST APIs and webhooks

Business systems and delivery: Salesforce, Flow, Sitetracker, Zendesk, Intercom; discovery, process mapping, roadmaps, stakeholder management, commercial analysis, user acceptance testing (UAT) and adoption

Stack managed with AI support: Python, TypeScript, JavaScript, SQL, FastAPI, React, Next.js, Supabase, pandas, Streamlit, PostgreSQL, Pydantic, Docker and Hetzner

EDUCATION AND CREDENTIALS

MSc Management | ESMT Berlin | 2017 to 2019 | Business Analytics

Bachelor of Business Administration | Koc University | 2011 to 2016

Credentials: Adobe Analytics Business Practitioner; Adobe Experience Platform

Languages: Turkish (Native), English (C1), German (B1)
